<ul style="list-style-type: none"> <input checked="" type="checkbox"/> Energy Audits & Feasibility Studies <input checked="" type="checkbox"/> Energy Management Control Systems <input checked="" type="checkbox"/> Engineering Services <input checked="" type="checkbox"/> Project Development & Implementation <input checked="" type="checkbox"/> Project Management <input checked="" type="checkbox"/> Energy Performance Contracting <input checked="" type="checkbox"/> Monitoring and Tracking Services Benchmarking <input checked="" type="checkbox"/> Training, Communication & Awareness <input type="checkbox"/> Other: 	<ul style="list-style-type: none"> X Institutional x Commercial x Industrial <p>Please indicate any specific municipal experience:</p> <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p>Approx 100 municipalities and organizations in Atlantic Canada, including the biggest, the smallest and everything in between</p> </div>
---	---

Elaborate on specific areas of technical expertise (e.g. lighting systems, motors, compressed air systems, HVACs, building envelope, fleets, renewables, etc.)

Enerscan has been in the business of energy management consulting since 1981. There is no area of activity in which Enerscan does not already have considerable experience, including working with and / or directing over 100 municipalities in the right direction for energy management and / or greenhouse gas emission reducing activity. We have provided the training for most others in Nova Scotia who are now active in this field, and continue to be the one company whose experience is significantly broader and deeper than virtually all others in Atlantic Canada. Enerscan’s work has reduced energy costs throughout the world by billions of dollars, creating a huge environmentally beneficial impact.

In municipalities the areas of prime opportunities are in arenas, office and residential buildings, fleet management, water and sewer systems and elsewhere. Through accurate energy audits it is possible to identify the areas where there exists potential to cost effectively save energy and create greenhouse gas emissions reductions that are important to many and enable funding for implementation. Enerscan can provide assistance and leadership throughout the process.
