---	---

Elaborate on specific areas of technical expertise (e.g. lighting systems, motors, compressed air systems, HVACs, building envelope, fleets, renewables, etc.)

HMJ has become recognized locally and abroad for its expertise in the provision of environmental, engineering and planning services. HMJ’s mandate is to provide its clients with access to a full spectrum of quality consulting services within its areas of specialization, which include: industrial process engineering; project management for property development and building systems; eco-efficiency and renewable energy projects and assessments, solid and hazardous waste management; environmental management; pollution prevention and implementation strategies; professional planning including feasibility and facility master plan studies, land use planning, infrastructure, municipal plans and by-laws; multi-disciplinary engineering; and environmental assessments, monitoring programs, and remediation. HMJ’s team of professional employees has worked together for a number of years and they bring a wealth of experience in their technical and scientific fields which provides considerable depth and breadth to the firm’s capabilities. The firm also enjoys alliances with several professional associates and associations, who are engaged on a project basis to make up fully qualified and experienced teams as required.
