Elaborate on specific areas of technical expertise (e.g. lighting systems, motors, compressed air systems, HVACs, building envelope, fleets, renewables, etc.)

I.B. Storey specializes in energy auditing, energy engineering and energy management planning services for commercial, institutional and industrial clients across Canada. Comprehensive energy auditing results in the identification of clear and concise energy conservation and optimization opportunities for all energy consuming systems (refrigeration, air conditioning, heating/boilers, building controls, HVAC and lighting systems are inventoried and undergo a thorough review), as well as recommendations for staff training, major retrofits and retrocommissions. Energy assessments include detailed breakdowns, analysis and calculation of energy consumption, opportunities for savings, payback and financial analysis, and implementation planning. Professional services place a high value on assisting clients in their energy management planning throughout the organization.
